

## AI DISCLOSURE CHECK

---

The use of AI, Generative AI, and other similar technologies and tools in the creation, writing, editing, and sourcing must be disclosed. The AI disclosure must follow the template below and sent to the Para Doxa team:

- *Title of Article:*
- *AI Tool Used:*
- *Purpose of use (e.g. research, writing, revision, others):*
- *Description and extent of use:*

The use of AI tools for grammar, spelling, and punctuation checks is not covered by this rule and therefore does not require disclosure.

However, authors must exercise necessary oversight over any Generative AI tool(s) used, and will be held primarily responsible for the factual accuracy of the generated text, proper citation and attribution of the generated information, and that no plagiarism or any form of copyright infringement is committed while using the AI tool.

Authors are accountable for adhering to Para Doxa's guidelines and ethics. Any breach of these standards and ethics will result in an immediate rejection of their article, irrespective of its stage in the review process. If such a breach is discovered after publication of the article, the Para Doxa Editorial Team will promptly investigate and take appropriate measures. Such measures may involve removing the published article, issuing an erratum, and forwarding notifications about the breach to relevant academic or legal bodies as the situation may require.
